RELEVANT EXPERIENCE

Tropical Ecology Summer Course Costa Rica
The *University of Georgia*

Summer 2014

- Designed and executed a research project with peers comparing frog species densities along trails and in the forest
- Set up transects, counted frog individuals, identified the encountered species, and took abiotic conditions
- Designed and executed a research project with peers examining the relationship between Cecropia trees and Azteca ants
- Logged sampled trees into a GIS device, developed method for quantifying herbivory, measured tree height, and took DBH
- Entered and analyzed the collected data
- Co-wrote two unpublished research articles for each project
- Presented my findings for each project at a campus-wide symposium

EDUCATION

The University of Georgia, Athens, GA

December 2016
